## **DETAILED ACTION**

### ***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "22" has been used to designate both "Hanging Rod" and "Rubber Bumper". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "locking mechanism for the swivel wheels" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

### ***Claim Objections***

3. Claim 1 is objected due to the following: In claim 1, line 9, "on the bottom sides" is set fourth. It is suggested that claim 1 be amended to recite —on the bottom—since a

Art Unit: 3618

round surface can't have multiple "sides". Claim 1 is being considered as such.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 3618

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gresch' (US Patent No 5183280) in view of Chen'962 (US Patent No 5617962) and Thompson' 202 (US Patent No 6880202).

8. The Gresch reference teaches the claimed invention including swivel wheels (see figure 4, element 18A) at the bottom of the conical shaped basket having the smaller end facing upward (see figure 2, element 12) including a padded bumper on the bottom side (see figure 4, element 11). The Gresch reference does not teach hanging rod supported by two vertical support bars. Chen discloses a hanging rod supported by two vertical support bars (see figure 1A, elements 600 and 500). It would have been obvious to one having ordinary skill in the art at the time of the invention to include a hanging rod with two vertical support bars in which will better accommodate and transport the hanging garments in a manner to transport them smoothly.

9. Although the prior reference mentioned does not include a locking mechanism for swivel wheels, attention is directed to the Thompson reference, which discloses locking mechanism for swivel wheels. To provide wheels such as that taught by Thompson on the Chen device would have been obvious to one skilled in the art that would have been a mere substitution of one wheel for another within the locking art that would work equally well.

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
